DETAILED ACTION

Response to Arguments

Applicant's arguments, see Amendment - After Non-Final Rejection, filed 06/20/2006, with respect to claims 1, 9 and 12 have been fully considered and are persuasive. The rejections of claims 1, 9 and 12 have been withdrawn.

Allowable Subject Matter

Claims 1, 2, 4-13 and 15-20 are allowable.

The following is an examiner's statement of reasons for allowance: claims 1, 2, 4-13 and 15-20 are allowed because the references cited fail to teach, as applicant has a first digital filter having a first filter input coupled with the digital signal, the first digital filter filters the digital signal at a first interference attenuation factor to produce a first filter output the first filter output comprising the amplifier control signal, the first filter output being proportional to the magnitude of the interference signal when the interference signal is greater in magnitude than the target signal thereby to cause the amplification level set by the amplifier to be proportional to the magnitude of the interference signal; and digitally filtering the digital signal at a first interference attenuation factor to produce a first filter output proportional to the magnitude of the interference signal when the interference signal is greater in magnitude than the target signal, adjusting the amplification level at which the received signal is amplified based on the first digital filter output such that the difference between the maximum possible digital signal and the amplified signal is decreased when the interference signal is

greater than the target signal and thereby to cause the amplification level to be proportional to the magnitude of the interference signal, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
